SOFTWARE ENGINEER

Experienced Software Engineer with 2+ years in backend development, specializing in Java, Spring Boot, and AI/ML integrations. Proven success in delivering scalable solutions, optimizing e-commerce platforms, and enhancing user engagement through innovative cloud technologies. Passionate about leveraging technical expertise to solve complex challenges in fast-paced environments.

TECHNICAL KNOWLEDGE

Programming Languages

Java
Python
Nodejs

Frameworks

Spring
Django
Flask

Databases

MySQL
PostgreSQL
Elasticsearch

Cloud Services

AWS EC2
AWS S3
AWS Lambda

PROFESSIONAL EXPERIENCE

Curebay Technologies Software Engineer

Nov 2022 – Jan 2025

Demonstrated exceptional leadership by managing the end-to-end development of the Chat Commerce project, delivering it successfully from concept to live launch. Led a cross-functional team in designing, implementing, and deploying architecture for a WhatsApp Chat Commerce platform, fostering collaboration across engineering, product, and UX teams.

Chat Commerce Application

Designed and developed an end-to-end WhatsApp Chat Commerce platform to enhance patient access to healthcare services.

Key Accomplishments:

- Developed and deployed WhatsApp-based features for medicine ordering, doctor consultations, and lab test bookings, reducing booking time by **50%** and increasing patient engagement by 30%
- Improved accessibility and engagement, streamlining the patient experience.

B2C Application Migration & Optimization

Led the migration of Elasticsearch to a SaaS model and improved e-commerce functionality for enhanced user experience and revenue growth.

Key Accomplishments:

- Migrated in-house Elasticsearch to SaaS Elastic, reducing server costs by **40%** and improving search response time by **25%**.
- Enhanced cart functionality, increasing checkout conversion rates by **20%** and boosting overall revenue by **30%**.
- Upgraded search capabilities with location-based and alternative medicine suggestions.

AI/ML Integrations & Engage Application Enhancement

Led the integration of AI/ML for real-time dental reports and healthcare suggestions, while enhancing the Engage application to improve partner service onboarding and CMS management.

Key Accomplishments:

- Empowered users to upload dental images and receive AI-generated reports in real time via WhatsApp and email.
 - Launched the CareSathi AI chatbot, offering personalized healthcare suggestions based on trained datasets.
 - Reduced incorrect partner service onboarding by **20-30%** through duplication issue resolution.
 - Integrated Content Management System (CMS), significantly reducing development time for managing static APIs.
-

Odisoft technologies

Jan 2022 – Oct 2022

Software Development Intern

Orchestrated the development and optimization of the ImportKey website, improving data retrieval speed by **30%** for retail and wholesale shop owners.

Accomplishments:

- Utilized Elasticsearch to improve search functionality, reducing query response time to under **200ms** for a database of **26 crore records**. Utilized Django and AWS Elasticsearch services for data retrieval optimization.
 - Engineered a scalable backend solution for the platform using Spring Boot and AWS.
 - Gained hands-on experience with AWS EC2, S3 buckets, API Gateways, and Queues to enhance application scalability and performance.
-

Agnito Technologies

Oct 2021 - Nov 2021

Software Development Intern

Collaborated with senior developers to design and optimize PHP-based frameworks, enhancing functionality by **15%**.

Accomplishments:

- Developed skills in PHP, Laravel, CodeIgniter, and phpMyAdmin through active learning and project work.
 - Advanced knowledge of backend development and database management, contributing to a **10%** improvement in query response time.
-

EDUCATION

Laxmi Narayan College of Technology & Science

Bachelor of Technology

2018 – 2022
